### Summary

I wanted to use this random Amazon webcam for Octoprint. I made the arm and the part mounted to the camera.

I wanted to use this random Amazon webcam for Octoprint. I made the arm and the part mounted to the camera. The connecting parts are from the original model I remixed. The tolerances were a little loose in the ball joint for me so I put some glue in it to hold the camera at the angle I wanted. I also glued Webcam Mount v1 and holder\_2 together because I didn't have screws small enough for the holes. Webcam Mount v1 can be replaced with any part that fits your webcam better.

### This remix is based on

**camera holder**
