## Summary

A drawer/shelf system for organizing and storing 3d printer nozzles.

Tags: [3dprinting](#) [organization](#) [nozzleholder](#) [nozzlebox](#)

Apparently my Nozzle drawers were uploaded a day or two too early to be part of the contest so I made a new design. Each box can hold up to 5 nozzles and the shelf has slots for 20 boxes. Each box can work as a small standalone nozzle case too, of course.

There are several bottom files for the box, which are useful for indicated the size of the nozzles stored inside or you can label the blank one yourself. Printing boxes in different colors could be a nice method of organizing as well if you felt like using a different box for used nozzles, hardened steel or any reason you can think of.

I know the shelf is on the large side but it should be able to be printed with 0% infill without a problem if there are at least two perimeters.
