---

I have my Photon in an enclosure and cannot flip the lid over the center of gravity while working in the machine.

This is a Kickstand of sorts to keep it up and out of my way. Slots onto the Lower Left corner of the lid and sits on the top left of the frame in the lid opening.

There are spots for a 3x10mm magnet (home depot/lowes?) to assist with keeping the lower part of the kickstand in place. During my testing, they weren't needed though.

### Print Settings

#### Printer Brand:

Creality

#### Printer:

Ender 5

**Rafts:**

No
