Hi all! I had an art opening at my school, showing my vases and a few of my Futurama replicas, as well as a few models I've painted (namely a Triceratops Skull Scan and that Deathtrooper head that was popular a few months ago). People at my school like my designs so much that they asked my roommate and I to each fill a display case in the library at the end of March. From now to March, I'm going to be focusing on designing more Vases, as well as I've started on some political designs, and some new Futurama-esque characters done in the same style, but original characters.

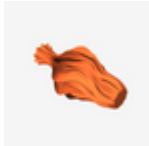

Anyway, this is an Amphora I designed based on multiples of 10. There are ten faces on every side, except for in two sections where it is based on 30 faces. Thank you! I like this design a lot.

I'm going to start designing a few Amphora which will differ from my vases in that they will all try and have a spin on the classic Greek amphora shape.
