updated 28. 3. 2022 | published 28. 3. 2022

Summary

This wall mounted cat toy uses a large torsion spring to suspend common toy attachments.

This remix of the [Spring Latch](#) mechanism turns it into a wall mounted cat toy.

<https://youtu.be/JA9fNA1EJRw>

Customization

Choose between the loose spring or the stiff spring depending on how strong you want the latch hold to be.

Add your pet's favorite toy attachments to the end of the spring arm.

Printing

No supports required.

Print the springs with enough perimeters (shells) so that the arms of the spring are solid.

Assembly

Use a small short screw to attach the spring to your wall. Make sure any hardware sits flush or nearly flush with the latch surface.

The axel is a tight fit inside the handle. Glue or bolts should not be necessary, but the design supports using either.

Can I sell copies of this?

Yes! This project was shared under the [Creative Commons - Attribution](#) license.
