These files are organizer trays for Firefly: The Game designed to fit all expansion components in the base game box.

This is a complete redesign from my original organizer which was not able to fit the extra components from the Crime and Punishment expansion.

This organizer fits all components from the base game and expansions in the base game box with the exception of the game boards and player trays. It is possible to stack the large boards on top of the organizer, but it will cause a significant lid lift.

# Model files
