### Summary

A .step file form making your own front standard. The provided STL is just an Example.

[Gadgets](#) > [Photo & Video](#)

Tags: [diy](#) [modification](#) [polaroid](#) [filmphotography](#) [packfilm](#)

This is a custom front standard for all the polaroid 150-450 series pack film cameras.(metal front standard cameras only)

With this you can use a range of large format lenses, however **the provided .STL is only for preview purposes**. For making your own I recommend downloading the .step file and making a custom version for your FFD among with any aesthetic changes you want.

**The provided photo of the camera is just an example of what can be done.**
