70's cars just had different priorities.

- ✓ Ashtray
- ✓ Cigarette Lighter
- Cup holder

So I designed and printed this stealth cup holder for my 1973 Datsun 240z.

Yes, I made it to fit a latte, don't judge me.

This cup holder mounts under the seat bracket with the existing carriage bolt. If you have the risers for the seat installed you may need a longer bolt.

I'm pretty tall and drive with the seat almost all the way back. This cup holder is designed to just stick out just enough to keep my drink safe. If you're shorter, you might consider flipping it over and installing on the passenger side.

## Print instructions

Generic (Amazon Basics) PETG.  
0.15 layer height.  
50% fill.

Hilbert Curve top fill pattern for a nice finish.
