Hey it's the green bird from Minecraft. You'll need 5 colors (Green, Black, Dark Grey, White, and Light Brown), and each color prints separately. You shouldn't need superglue () to assemble the bird.

Printing should be straightforward. Just an important detail is that I use a color change for the eyes: white followed by black at the very end. I included my 3mf files to show exactly how I print everything.

Note: this thing is pretty tricky to balance. The legs need to be as level as possible. Not sure if adjusting infills really helps with the center of mass (I just used default values in PrusaSlicer).

Model files

Red Parrot Wings and Tail only. Other parts use Green Files
