I really enjoyed Sneaks' wonderfully designed Adjustable Stand and how well it works for tablets. Wanting a smaller version that fits for my phone, I scaled down the parts, removed material from the bases, and slightly modified the hooks.

I hope you enjoy this print!

## Tips:

- Refer to the images for proper assembly
- The rear cross-section fits into the opening and slides down into the slot to lock.
  - This is a very tight fit, even more so than the original design
  - I used a hammer originally to seat the part properly, but I was able to push it into place with my fingers with strong force too
- I had no problems printing in **0.20mm** layer height
