### Summary

A nozzle size and type indicator to remember for you what's in your machine

[3D Printers](#) > [Accessories](#)

Tags: [sign](#) [indicator](#) [nozzle](#) [nozzles](#) [nozzlesize](#)

I loved Filip's nozzle size indicator, but I frequently use different nozzle types as well. I hopped into Fusion, made a few changes, and voila!

I also wanted to have a multimaterial look without actually having a multimaterial printer, so I carved out the nozzle and filament icons and made them inserts into the front of the indicator.

Nozzle types represented are brass (B), copper (C), steel (S), hardened steel (H), nozzle X (X), and E3D's upcoming Obxidian nozzle (O).

All parts except the nozzle size rotor have been edited. I reuploaded the size rotor here to make things easier. Enjoy!
