Exposure button for Flexaret VI

## Print Settings

### Printer Brand:

Creality

### Printer:

CR-10S5

### Rafts:

No

### Supports:

Dont need

**Infill:**

100

**Filament:** Spectrum Premium PLA black

**Notes:**

Use glossy filament, I had only matt available.

**Post-Printing**

You might need some polishing after printing, but it fits exactly.

**How I Designed This****Design**

I broke the button on my own camera so I had to make a new one. I measured the original, as the most of the parts were still complete.

It was one of my first 3D designs so I know it could be better, I plan to do remake one day/someday :-).
