Masterful Dungeons Stone Floors are designed as part of a fully modular dungeon system built for tabletop RPGs like D&D and other TTRPGs.

These floor tiles are **double sided**, with each half connecting to each other with a allowing full control over dungeon layouts and easy reconfiguration. The system is built around **double-sided tiles that lock directly together**, with **no base layer required**.

The tiles are designed for repeated use, fast assembly, and teardown, while keeping everything secure during play.

> **Instructions for the tiles can be downloaded HERE**

Key features

- Compatible with the Masterful Dungeons tile system
- Modular stone floor tiles
- Double-sided locking design
- Floors connect directly to other tiles
- No base required
- No glue or permanent assembly
- Designed for repeated assembly and reconfiguration

Included files

- 2x2 Floors - Stone
- 2x1 Floors - Stone
- 3x1 Floors - Stone
- Floor connector - Stone
    - Used to close gaps in the grid, created by walls.

Filament

I test out a lot of different filaments for each of my specific builds, to make sure that the strength and print quality is as good as they can be. My filament recommendations can be found on my website HERE.
(NOTE: The links on my site are affiliate links)

Magnets

The tiles and this tool were designed to use 5x2mm magnets.
I buy them on Amazon as this is where I've been able to buy the most at the same time and at the best price:

Printing notes

- Designed for standard 0.2mm layer height
- No supports required

If the tiles are too tight

- The locking mechanism is supposed to be tight. (read the instructions)
- Filament and print quality can make the tolerance tighter than it's supposed to be
- Changing the value of the XY-Compensation (Bambu Studio) can help adjust the tolerance.

Help me expand the collection

You support is directly tied with how much I can work on these tiles.
If you like what I do, please consider donating to me on Patreon or subscribing to my campaign Secrets of Ke'Landor which is a fully curated campaign, centered directly around these tiles.

Even just subscribing to my TikTok or YouTube channel or visiting my website can be a big help.
