Masterful Dungeons Props are designed as part of the fully modular Masterful Dungeons system built for tabletop RPGs like D&D and other TTRPGs.

These props are **standalone pieces**, intended to be placed freely on top of the floor tiles or attached magnetically to the walls, to add visual details.

Filament

I test out a lot of different filaments for each of my specific builds, to make sure that the strength and print quality is as good as they can be. My filament recommendations can be found on my website HERE.

Magnets

The tiles and this tool were designed to use 5x2mm magnets.
I buy them on Amazon as this is where I've been able to buy the most at the same time and at the best price:
