### Summary

Squid Games inspired keychain holder.

[square](#)

A plain silly key-holder based on Squid Games. The individual keychains are to be inserted on either Triangle, circle or square. There are four keychains but only 3 options...

The font I used is free for personal use and is available at [Game of Squids Font Download \(fontmeme.com\)](#).

Printed on PLA, 0.4mm, 0.2mm layer height and 15% infill.

About the pictures... I admit I got lazy. Didn't sand, didn't touch up. I simply applied acrylic paint with a brush.
