Tags: [dji](#) [remotecontrol](#) [gimbalprotector](#)

I wanted some protection for the gimbals of my controller so I designed this protectors.

I have printed it with support and 30% infill. My print have needed some cleaning of the hole with a 8.5mm drill to remove the z-scar.

Revision 29.03.22: I have added a 2nd Version without the radius on the button. This version could be printed without support. It should also fit very well, but I have not tested it.
