[fursuithead](#) [fursuitheadbase](#)

This head base was made to build a Panda costume. The head base can be used to build a puppet-, plushie-, robot- or a fursuit-head (costume). I did add some ventilation holes, that can also be used to attach fur. The lower jaw is movable.

The ears are not included. Having rigid ears on a costume is not a good idea. I would make those with flexible foam.

The head is scaled for costume size (for small heads) - rescale it if you need to.

How to make the pegs for the lower jaw:
