updated 1. 5. 2022 | published 29. 3. 2022

## Summary

insert for storing 9x4 nozzles (36)

[3D Printers](#) > [Accessories](#)

Tags: [box](#) [nozzle](#) [boxinsert](#) [trianglelab](#) [nozzlebox](#)

an insert for the trianglelab box, with markings for 0,15mm to 0,8mm nozzles

switch the fillament after the first layer

I added 2 blockers to glue on top of the inserts. No need to keep the foam anymore, the blockers keep the insert from moving in the box, and it is easier to close the box now.
