Summary

vertical laptop stand for desk space

[Gadgets](#) > [Computers](#)

Tags: [desk](#) [laptop](#) [laptopstand](#) [organization](#)

A vertical laptop stand to create more space on the desk for other things. And as a nice side effect, the laptop also gets more air when running because it's not lying flat on the table.

Originally I had designed the stand for a specific laptop with 27mm thickness.

If there is interest in a different thickness or without a logo, please comment. :)
