Coaster for bottles of red wine (but also white).

Two versions with bas-relief and high-relief, the second much easier to print, the thickness of the high-relief is only 0.4mm so as not to compromise the stability of the bottle.

It is not exactly a remix of the reported model, I simply copied the drawing of the bunch of grapes.

You can find all my models [here](#), thank you who will appreciate with a **download** or with a **like**
