Hi, this is my first remix ever.

I wanted a Gt2 pulley 2mm pitch that can be fitted on a 5mm round shaft (nema 17 stepper motor) so I remixed [Džino's](#) design

I also added 2 design one with a 4.8mm and one with 5mm

The printed one its the 4.8mm center bore and its a tight fit

### This remix is based on

## Pulleys GT2 - 20T set

by Džino
