Tags: [customizable](#) [nameplate](#) [openscad](#)

Customizable name plate with mounting holes. I added the holes at the end of the SCAD sketch and they can also easily be removed, relocated, etc. The original name plate without mounting holes is here: <https://www.thingiverse.com/thing:1731842>

The model in the photograph was a two color print with manual filament change designated in Prusaslicer. A couple of peel and stick magnets were put on the back.
