### Summary

A dragon head I am designing as part of a full dragon (very high resolution)

---

This is the head of a dragon that I am designing using Nomad Sculpt.

The final version may be available for sale or for free, but it will be much more detailed, this is a sneak peak of the model.

this does not stand up on its own, maybe if you cut off more of its neck...

Needs supports to be printed, recommended to use an MSLA 3d printer because of the very high details and complex model.
