[high](#)

garden hose nozzle for high pressure.

requires 12mm o-ring for sealing.

these can be bought at hardware stores or online cheaply.

support is only required at the part where the o-ring seals

i used the paint on feature in prusaslicer for these supports. included in the 3mf file.

the 3mf file is setup for esun pla+ on mk3S

printed with 4 perimeters, 50 percent infill pla+

design works well, though i might investigate changing the nozzle hole size to see if it can be improved any further
