Summary

Mount a pencil style microphone on a standard tripod.

[Gadgets](#) > [Audio](#)

Tags: [tripodmount](#) [tripod](#) [microphone](#)

A clip for mounting a pencil-style cylindrical microphone on a standard tripod.

There are several sizes, named for the nominal diameter of the microphone. The actual diameter of the clip is slightly smaller, to provide some spring tension. A common diameter for these microphones is 19mm, but there are many variations. Select the one that suits your mic.

After printing, press a 1/4"-20 nut into the cavity. This will fit the screw on a standard tripod. There is also a small hole in the bottom surface to accommodate the locating pin that many tripods have.
