Summary

Makes your spare nozzle easy to find - doubles as a purge strip remover no more plastic splinters under your thumbnail!

Tags: [holder](#) [nozzle](#) [storage](#) [bed](#) [scraper](#)

I only have two “spare” nozzles, and they rattle around very happily in their little plastic drawer, even if they are a bit hard to fish out when the time comes.

This holder makes them easier to find, but more importantly can be used as a push stick -lifter-scraper to remove the purge strip on every print, solving what for me is the most painful part of the 3d printing process - the old purge strip under the fingernail trick!

Print in any material that takes your fancy, and simply screw in your spare nozzle.
