Summary

A replacement cable horn for under the rudder of your Avios extra 330LX. Single and double versions.

Tags: [hobbyking](#) [extra](#) [avios](#) [330lx](#)

I got a badly crashed Avios extra 330LX from someone and I'm slowly rebuilding it through the power of 3D printing and glue.

Here is part 2: a replacement cable horn for the rudder.

I recommend printing these parts at least in PETG or ABS. Something like 4 walls and 40% infill should be OK.
