Tags: [bild](#) [green](#) [hexagon](#) [moss](#)

Hexagon element for mounting on the wall as a moss picture.

Dimensions are:

230 mm diagonal, 30 mm height and a wall thickness of 5 mm.

Printable in any material preferably PLA.

No support necessary.

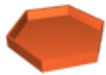

Number of elements is arbitrary, I recommend at least 10 elements.

Afterwards, the moss must still be populated. Moss is available from various dealers (Mooseule.de/Amazon.de).

Required amount is about 1-1.5 KG for 10 elements depending on the quality of the moss.

As glue I recommend the hot glue gun, because it works great. When all elements are equipped, then only attach to the wall. Away from drilling I have attached the elements with strong double-sided tape to the wall.
