I designed this sign for my cat's pet house. Her name is Lola. I designed an alternative design for dogs, and an example with the name "Rex". You can add your own text editing the model in Tinkercad f.e.

Each part has different heights, so you can print the model in different colors as I did with a single extruder. In my case, with 0.2mm layer height, I added pause scripts in cura at these following layers:

- 1: Firsts layers was printed with orange PLA.
- 2: Paused at layer 16, filament changed to gray PLA.
- 3: Paused at layer 26, filament changed to green PLA.
- 4: Paused at layer 31, filament changed to wood filament.

The recommended height of the text is 3mm tall, if you want to print this model in different colors like I did.

Feel free to share your pictures if you decide to make one yourself!

Print Settings

Printer:

Anet A8

Rafts:

No

Supports:

No

Resolution:

0.2mm

Infill:

20%

Notes:

I printed this model at 100mm/s for testing higher speeds that ones I'm used to.
