The wrists of my big hands never touched the stock wrist rest on my K70 RGB so I designed this spacer. I printed it with black REC ABS but I think PLA will work just fine.

This spacer adds 40mm between the wrist rest and the keyboard of the Corsair K70 RGB or K65 RGB (both MK1; please confirm in comments when you have the K65 RGB). It's just as convenient to mount as the stock wrist rest.

v1.1 has some holes on the side walls so the supports are a bit easier to remove.
