Ultimaker Original

#### Rafts:

No

#### Supports:

No

**Resolution:**

0.2

**Infill:**

100%

**Notes:**

Printed in **Colorfabb PETG**

## How I Designed This

### Step 1: Getting board dimensions

Removing some sharp edges from the electronics board. Measuring the exact dimensions with a caliper and putting them in Fusion360

### Step 2: Making the case

Taking the board design in a new constrution and designed the case and top depending on the board dimensions (tolerances etc.). So adjustments to the board size affected the case size... 1 iteration later ... the final design

Category: Electronics
