V1.2 Dualshock 4 / PS4 controller mount for iPhone.

I made this so I could stream pc games on the go to my phone using the Steam Link and moonlight apps, I wanted a single piece mount that was simple and ended up using a thick rubber band to hold it to the controller. The end result ended up being a simple and very sturdy design.

Please note this is a personal design and creation to snugly fit my 'old' and used phone so be careful as its designed to be a tight friction fit.

Fits iPhone: 6 / 6s / 7 / 8 / SE (2020)
