Tags: [nintendo](#) [stylus](#) [2ds](#) [nintendo2ds](#)

If you don't have a 3D Printer I can make it for you from my stores on eBay and etsy

etsy -

<http://www.16bitgamestore.etsy.com/>

eBay -

<https://www.ebay.ca/usr/16bitvideogamestore>

I've had issues printing this in Prusa Slicer, Maker Bot's Cura is the only reliable way I've been able to print these.

Bed Temp 50C

Raft

0.1mm layer hight

100% infill

The model is designed per-oriented so that it'll print with no supports. Arrange the Model so that the raft covers the entire stylus. should be printable on it's side. If the tip is too pointy when the print finishes, the bed temp is too high and you need to cool it down more.
