The Cinq Shift:R[*] levers have a slightly odd profile (in my opinion), where it puts a lot of point pressure on your thumbs and makes it easy for them to slip off. I've designed a print that clips over the lever and gives it a flatter, concave profile.

Print Settings

Printer Brand:

Wanhao

Printer:

Wanhao Duplicator i3 Plus

Rafts:

No

Supports:

Yes

Resolution:

0.08

Infill:

50

Notes:

Best printed with Cura tree support in the same orientation as in the files. It could also be printed vertically, but the print needs a bit more manual finishing in that case (unless your printer is spectacularly good.)
