Tags: [windmill](#) [mill](#) [buitenmolen](#)

This model was made for the miller of the windmill, and provided me with the opportunity to play around with 3d modelling. :)

For some background and/or colors see [https://en.wikipedia.org/wiki/De\\_Buitenmolen,\\_Zevenaar](https://en.wikipedia.org/wiki/De_Buitenmolen,_Zevenaar) :)

### Printing

You only need supports for the "Kap" and a brim around the small parts.

Would suggest that you use the layout of de\_buitenmolen\_v57\_sliced to print, and glue the parts together in the position you like.

### Updated

Version 57: added the railing above the entrance on the belt.
