A cup holder that fits over the top of the frame of an **IKEA KOARP** chair. I don't have much room for an end table in my living room so this seemed like the most logical solution to keeping my beverage off the floor. The cup holder is 94mm wide and 50mm deep. Holds my Yeti Colster perfectly.

I've included the .f3d file as well if you need to tinker with it at all. I'm a complete Fusion360 novice so I'm sure it's not built "correctly" but it got the job done.
