Summary

When preheating or cleaning, the droppings usually go to the left side of the printer. This tray collects them all!

Tags: [mk3s](#) [tray](#) [prusai3mk3](#)

When preheating material, the oozing from the nozzle usually drops to the left side of the printer, not to mention all the bits here and there caused by using the brush to clean the nozzle. It's a pain in the a** to clean up! This tray collects all the headaches and let you dump it all in one clean motion!
