This is a single-model, assembled version of the Cubes necklace by FPVpolska. It looks super cool in real life!

Print with:

- at least 3 layers shell or 100% infill
- supports

You may need to try a couple different types of supports before you find one that detaches cleanly, without breaking the print. It took me a couple prints before I got one where I was able to cleanly detach all the supports without snapping one of the cubes.
