Summary

I was annoyed that this wonderful headset would not fit my head, so I designed an adaptor to rectify the problem.

I was annoyed that this wonderful headset would not fit my head, so I designed an adaptor to rectify the problem.

It comes in 2 parts: a body, and a latch. The latch is there to prevent the cups from sliding off the adaptor body.

It goes without saying that in order to install this adaptor, some dissassembly and reassembly of the headset is required.
