This is a Yamaha tank badge that I designed and printed for my KZ650SR tank. The holes centre to centre are 123mm, and accept 3mm countersunk screws.

I printed this in PETG at 100% on an Ender 3 and the size fit my tank perfect.

The print nicely bends around and fits the contour of the tank.

I plan on masking off the letters and painting the background black to add some contrast.
