Meet the Flexi Valentine Dragon — a cute articulated dragon with heart-shaped scales, tiny wings, and a curled tail.

It’s designed as a fun, flexible print with smooth joints, making it satisfying to pose and fidget with.

Features

- Fully articulated body (flexi joints)
- Heart-scale texture + cute face
- Prints **with supports!!! (Wings and under the head)**
- Great as a gift, desk toy, or decoration

Printing notes (recommended)

- **Supports:** YES
- **Brim/Raft:** Optional (only if your bed adhesion is weak)
- **Infill:** 10–15% (or more if you want it heavier)
- **Layer height:** 0.20 mm (0.16 mm for extra detail)
- **Walls/Perimeters:** 2–3
- **Top/Bottom:** 4–5 layers
- **Speed:** moderate for clean joints
- **Material:** PLA recommended (PETG also works, but tune cooling)

Tips for perfect joints

- If joints are tight: increase **horizontal expansion** slightly negative (e.g., -0.05) or reduce flow a tiny bit.
- If joints are loose: add one more wall or slightly increase flow.

Enjoy printing — and if you post a make, I'd love to see it.
