Variants:

Ledger Nano S case <https://www.thingiverse.com/thing:4893798>

Micro SD cards case <https://www.thingiverse.com/thing:4894171>

Water resistant case for usb drives. Print slowly with many shells and optionally add a bit of PTFE on the threads. The internal part should be made of TPU or some flexible material or a USB won't fit.

The internal padding needs to be printed with 1 shell and no infill

Test the water resistance before inserting anything valuable. I'm not liable for any damage
