Tags: [nozzle](#) [cleaning](#) [keyboard](#) [festool](#) [shopvac](#)

This is a nozzle for a Festool shopvac for cleaning keyboards, especially laptop keyboards. It is shaped so that it sucks between the keys, rows and columns, and the opening is too small for keycaps or track point caps to be sucked in. Hopefully. I still take off my track point cap before vacuuming the keyboard, just in case.

Because this is for Festool, use neon orange colour as usual for extensions.

I cannot consistently upload to Thingiverse anymore ('item not found'), so I redundantly put the files here: <http://www.theiling.de/cnc/date/2018-04-30.html>
