---

I made these feet so as to get a decent amount of clearance underneath the print bed so I can then lower the mainboard and fit some forced air cooling for the stepper drivers.

It will also give me more room to fit a separate Mosfet for the heated bed.

If they are too tall for your needs simply reduce the Z % height only in you preferred slicer software.

### Print Settings

#### Printer:

Anycubic i3 mega ultrabase

#### Rafts:

No

### Supports:

No

### Resolution:

0.2

### Infill:

10%
