Summary

This is my second version of the drill holder that I designed (<https://www.thingiverse.com/thing:3501768>).

This is my second version of the drill holder that I designed (<https://www.thingiverse.com/thing:3501768>). I recently set up a new work bench and realized that my old design wouldn't fit properly on the new bench so I made this one more compact. Oh and it will also double as a beverage holder.....

Designed to print without supports in any material that you like.

You will need a long screwdriver to mount it as you will need to pass through the entire print.

Print instructions
