5 String Concert Ukulele

A [commenter asked](#) on my other project (a "normal" 4 string [Concert Ukulele](#)) asked if my generator can produce a 5 string version, so here it is!

DISCLAIMER: I haven't tried printing it yet!

Third Party Parts:

- Spine/rods e.g. <http://www.acpsales.com/.125-x-.325-Rectangular-Rod.html> or <https://dragonplate.com/ecart/product.asp?pid=749&cld=20>
 - get two 24" long rods and cut it down to size
 - if you don't use a rod, the neck will bow under string tension
- Gotoh UPT-UBB-B Tuners e.g. <http://www.theukulelesite.com/gotoh-upt-tuner-upgrade.html>
 - its possible to use cheaper friction tuners

- M2 wood screws like these <https://www.amazon.com/gp/product/B01MTKUV85>
- To be printed on big delta style printers, oriented with neck pointing up, like a flower vase
- I recommend 100 micron, at least 33% lattice infill.
