updated 12. 4. 2022 | published 30. 3. 2022

Summary

Avoid the dreaded filament loop under.

[3D Printers](#) > [Accessories](#)

Wedge the first loop into the lower slot. Use a finger on each side of the clip to snap the end into the upper channel leaving about 5cm of slack. Pinch the filament behind the clip and push towards the loose end. Things should be nice and secure.

Print Settings

Notes:

0 top/bottom layers

.4 wall thickness

3 walls

It's best to break in new clips with a scrap piece of filament. A tool might help to snap them on for the first time.
