I was annoyed with my school ID badge flipping around while I was wearing it. To solve this, I made a printed hook that slots into the back of the badge clip and prevents the ID from flipping around during normal use.

Works well for day-to-day use of the ID, and the hook isn't noticeable from a distance.

also, apologies for the crummy gifs, had to get the demonstration videos below 500 KB :(

## Print Settings

### Printer Brand:

Prusa

**Printer:**

I3 MK3S

**Rafts:**

No

**Supports:**

No

**Resolution:**

0.10mm layer height

**Infill:**

15%

**Filament:** hatchbox PLA black

Category: Other
