I saw the original design and thought it would be a great option for storing my sandpaper.

Unfortunately I use diablo sandpaper disks which offset one of the holes in the paper by a couple of mms such that they just didn't fit. I scaled down the pegs to 75% in the radial (in/out from center) direction to give some to give some wiggle room. The other direction of the pegs stayed the same and still holds the disks very securely.

I still need to print the box that holds all these from the original design.
