This part replaces the small plastic retainer that stops the check valve ball from traveling up the beer outlet tube on a kegerator beer coupler.

Evidently, these parts are way over the top expensive (\$8 for a dime size part...) so after losing mine I modeled this replacement.

This part has been printed and tested, it works great!

Print Settings

Resolution:

0.1

Infill:

100%

Notes:

Print in PLA or other food-safe plastic. Slow and steady wins the race on a small part like this one.
